## ABOUT WARRANTY

- Avoid air bubbles or waves after application:
- Never mix water to adhesive. Use only water based adhesive.
- Surface must be even.
- Uncertain and frequently changing weather may cause laminates to absorb moisture and lose it again resulting in air bubbles.
- If Acrylic Laminates of size more than 8ft\*2\* are used in paneling, they may end up having air bubbles.
- Lack of the time given to pressing leads to having air bubbles.
- Acrylic sheets should be kept evenly straight. If the sheets are in roll form, it should be kept straight for minimum 48 hours and then can be pressed for better results.

## CARE OF LAMINATES

- You are in the right hands!
- Adhams Skylite Decor are manufactured with aesthetics and durability in mind. When used as recommended, our laminates will last through the years. Adhams Skylite Decor are easy to maintain. We design our sheets using the typical internationally recognized technical standards.
- To remove more stubborn stains, use mild household cleansers, gently wipe down with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution as these may damage the surface of the acrylic sheets.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30 degrees Celsius may cause damage to the laminate surface.
- UV rays may reshape the laminate. Avoid outdoor applications.
- Have a thickness balance of +/- 10%

**Scratch Resistance**  
 Superior resistance to scratch  
 6H, abrasion and impact

**Stain Resistance**  
 Easy to clean with soap  
 & water

**Superior Gloss**  
 Maximum gloss level than any  
 other surface decor

**Ideal for Vertical Applications**  
 This decor is suggested for  
 vertical applications

- Kitchen Shutters
- Wardrobe
- Doors and drawer fronts
- Office spaces
- Wall panelling
- TV unit
- Furniture

Easy film removal  
 In 6 Or 7 Days Of  
 Application

Shake it well and lightly  
 spray on the surface.

Wipe the surface clean using a  
 light circular motion.

Please open the roll  
 immediately.  
 Do not pressurize while  
 opening roll.

## REASONS FOR AIR BUBBLE FORMATION ON LAMINATES

Uneven surface can cause debonding and bubbles

Use of extremely large acrylic/ PVC laminate sheets (more than 8 ft x 2 ft long)

High temperature and humid conditions are created to bond the sheets

When substrate loses moisture after installation

Insufficient pressure during the bonding will look like this

Use of water base synthetic resin adhesive or any other the PEVA (Polyethylene Vinyl Acetate Co-polymer) is used.

## TECHNICAL SPECIFICATION

Parameters	Acrylic Laminate	High Gloss Laminate Mica	PU Coating/ Duco Paint	Back Painted Glass
